

Prevent fraud, build loyalty, onboard and welcome back customers with frictionless identity verification services trusted by the world's leading banks and financial institutions.

- > Provide tailored customer experiences
- > Instantly onboard customers via mobile or kiosk with document and liveness checks
- > Authenticate sign-in attempts
- > Comply with KYC regulations and prevent fraud
- > Validate identities against government issued credentials at the time of enrollment

Use Cases

Customer Enrollment

Deploy quick efficient workflows to enroll customers using biometrics and document scanning that builds loyalty and prevents fraud.

Liveness Fraud Detection

ROC's patented passive liveness liveness solution prevents fraudsters from spoofing face recognition through use of photos, avatars, or masks.

KYC / ID Proofing

Validate customer or guest identities by comparing a live selfie to an approved ID card photo and confirming that the ID card is authentic.

1:1 Multi-factor Authentication

Strengthen security by adding biometrics as an additional layer of protection to prevent fraudulent transactions.

1:N Reverification / Deduplication

ROC's 1:N face matching software eliminates costly re-enrollments, reduces third-party validation costs, prevents fraudsters from opening accounts, and ensures an individual only opens one account.

Age Verification

Estimate a customer age based on biometric features for a low friction approach to protecting minors from accessing prohibited products or online content.
