ROC Enroll

Omnichannel customer enrollment, visitor management and identity proofing

✅ Evolve into the modern age by adding AI/ML face recognition and document proofing to your onboarding process

✅ Enroll customers, guests, or VIPs from anywhere using ROC's intuitive web or native mobile app

✅ Add secure, codeless identity verification to your online customer, visitor mangement, and loyalty program

Use Cases

Biometric Enrollment - Maintain the integrity of your biometric data with ROC's patented passive liveness detection.

Visitor Management - Verify visitors onsite or before they arrive using ROC's intuitive enrollment app that can search against watchlists or criminal databases to enable secure, frictionless access.

Omni-channel Identity Proofing - Engage customers securely in person or online by establishing a trusted and verified identity for a seamless, personalized experience.

Prevent Duplicate Accounts - Prevent individuals from opening multiple accounts by accident or for nefarious purposes.

Features

- Embed fraud detection tools into your existing onboarding workflow

- Perform state-of-the-art liveness detection to mitigate spoofing using ROC's patented passive liveness detection process

- Confirm face images meet quality thresholds at point of capture
  - ICAO/NIST compliance
  - Custom metrics

- Use Optical Character Recognition (OCR) and 2D barcodes to capture biographic details

- Match live selfie against captured credential image

ROC

Making the world smarter, safer, and stronger.

At ROC, we believe in the power of future-forward, ethically-driven technologies to advance the greater good – without bias or threats to privacy.

We develop mission-critical, military-grade computer vision algorithms that deliver enterprise-level performance with mobile-edge efficiency.

Our solutions are made in America, built on an industry-leading code of ethics, and trusted by the U.S. military, law enforcement, and global FinTech.

PROUDLY AMERICAN MADE

The fastest, most advanced suite of multimodal biometrics ever.

- Face, Fingerprint & Iris Recognition
- Object Detection
- Vehicle & License Plate Recognition
- Live Video Analytics
- Threat Detection

Join forces with the best.

ROC is made by humans, powered by AI, and backed by the best minds in national security and data science. Together, we'll help you deploy transformative identity proofing and threat detection solutions battle tested for the toughest environments.
