◆ROC

Weapons **Detection**

Identify suspicious objects and guns, including long guns, handguns, and other brandished firearms.

Detect guns where they don't belong.

In an active threat situation, every second counts. ROC Watch video analytics and AI threat detection mitigates active shooter events by providing early warning signals and actionable intelligence to proactively prevent incidents before they happen.

10x
Faster response times

8x
Faster video forensics investigations

100%
Cameras monitored with AI threat detection

Enhanced situational awareness for law enforcement and security.

PROUDLY AMERICAN MADE

Early Threat Detection

Extend your virtual security perimeter. ROC Watch provides an active layer of 24/7 protection, analyzing camera feeds for weapons and accurately detecting threats.

Rapid Response

Be aware the instant a gun is detected. Real-time, role-based alerts generate 10X faster response times, empowering security teams with extra time to react.

Enhanced Situational Clarity

Know the who, what, when, and where of threats. ROC Watch arms authorities with real-time intelligence, improving situational awareness, decision making, and outcomes.

Efficient Video Investigations

Expedite reviews and extract meaningful insights faster. Lock onto suspects or anomalous objects and their pattern of life with automated AI video forensics.

ROC

Revolutionizing active shooter response and prevention.

ROC Watch is a multimodal security platform, combining face recognition, gun detection, visitor management, and perimeter control. It harnesses the latest advances in AI vision to proactively screen video feeds for live threats and anomalies, and can be embedded into existing surveillance systems with just a few lines of code.

"

"Instant detection and rapid response are critical to protecting lives and mitigating gun violence in our schools, workplaces, and public spaces. In head-to-head comparisons against industry incumbents, premier law enforcement agencies have evaluated ROC as superior at recognizing brandished short guns, long guns, and persons of interest. On a daily basis, ROC is battle tested in the toughest environments, proving over and over again that instant detection can in fact save lives."

B. Scott Swann, CEO of ROC

ROC Watch is proudly made in America, built to the strictest ethical AI and data privacy standards, and trusted by the U.S. military, DOD, and law enforcement.
